

Illinois Environmental Protection Agency

Public Notice  
of the Proposed Issuance of a Federally Enforceable State Operating Permit  
for  
Corn Belt Energy Corporation in Heyworth

Corn Belt Energy Corporation has requested that the Illinois Environmental Protection Agency issue a federally enforceable state operating permit (FESOP) regulating the air emissions from electric power plant located at the Bloomington Normal Water Reclamation District facility at 16041 East 700 North East Road in Heyworth. The 1990 amendments to the Clean Air Act require potentially major sources of air emissions to obtain federally enforceable operating permits. A FESOP permit allows a source that is potentially major to take operational limits in the permit so that it is a non-major source. The permit will contain federally enforceable limitations that restrict the facility's emissions to non-major levels. The permit will be enforceable by the USEPA, as well as the Illinois EPA.

The Illinois EPA is accepting comments on the draft permit. Comments must be postmarked by midnight August 13, 2005. If sufficient interest is expressed in the permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, PO. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.

Persons wanting more information may obtain copies of the draft permit, and project summary at [www.epa.gov/region5/air/permits/ilonline.htm](http://www.epa.gov/region5/air/permits/ilonline.htm) (please look under All Permit Records, FESOP, New). These documents and the application may also be obtained from the Illinois EPA's offices at 2125 S. First Avenue in Champaign, 217/278-5800 and 1340 North Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.
